
Dan\'s spec 944 garage

Posted by rlofgren - 2008/07/11 13:59

i am building my brother dan a four car detached garage behind his house. I have been taking pictures as we go and i thought you guys might be interested.

Rick

here is one from when we started, Feb 08, it was too wet still and the machinery bogged down.

Looking good but Dan will fill it in no time. :laugh:

I saw the red 944 that Dan just picked up at Art's today. Body and motor looks clean. We can get that car ready for the August race. ;)

I guess by building Dan a 944 Spec Garage, he will have to own a 944 Spec to put it inside and now will be able to come out and race with us. :woohoo:

unless he spends all his spare \$\$ on the garage...

here's one with the foundation done and the base rock in ready for the slab.(anyone want to buy an ITA 2002 racecar?)

Before you put the roof on, make sure the garage has at least 10 feet ceiling so you can put a lift inside. ;)

Looking good Rick!

ditto on the lift.

Dan will fill that up in no time. :laugh:

moving cars in soon. we'll paint this weekend and cars in by sunday night. roof is done, siding is done, still no power, driveway not finished yet, but getting the cars inside would be a great step! We can fill the whole garage with 944s. 944 spec #30, Dan's S2, my 88 924s parts car, and my 84 non sunroof.
