A friend of mine, Marv Lofgren, saw your name on the website, and thinks that you may be a cousin. He's like to contact you by email if possible.

i think it's unlikely since lofgren is one of those made up names that we only started using 3-4 generations ago. before that it was all johanson, svenson, karinsdotter, etc. a lot of families picked a name out of a hat and then carried that name in a more traditional way. that being said, you can pm me his email and i will contact him.
