

WTB: Spec 944/ PCA SP1 race car

Posted by 993inncc - 18 Mar 2013 16:18

I've learned what I think is quite a bit in my short time learning about these cars and the series (including PCA's SP1)etc and I love the cross over to PCA's Spec series.

So.....now that I have a better understanding, I'm looking for a car. Needs to be complete and ready to race (spares a plus!). I don't have time for projects, so please let's keep this to "out of the box" ready to race cars other than maybe to lower a seat or something minor like that.

Unfortunately, I missed the green 901 car which ended up at what sounded like a great deal.

If you have a "ready" car and are reasonable in your pricing, I have cash and am ready. Price dependent, I will ship cross country (I'm on the east coast)for the right car so don't be shy.

TIA

No need to ship across the country.

[Race Ready](#)

Some spares available

I will put that 3rd or 4th on my list to check out. Already have two really promising prospects. Thanks!
