

WTB Short Block or Long Block

Posted by Spec944 #143 - 06 Oct 2011 06:10

I am looking to have the guys at Clownshoe build a spare motor over the winter. I need to find a block to start with. I would prefer one near or in Texas but will need to find one somewhere. If you have one that is in good shape please let me know.

Todd

Check with the guys at [Texas Performance Concepts](#)

They do engine swaps in 944s and may have something
