

1988 924S 944 high compression engine for sale

Posted by boostfeen - 17 Aug 2012 14:45

This is a complete engine removed from a 1988 924 S celebration car which had an Automatic transaxle and was never tracked. It comes with everything in pictures removed carefully with all engine wiring, '88 never opened computer, battery cables, hoses, late tubular exhaust manifold, fuel rail, injectors, AFM, air box, alternator etc.....

The engine harness is a direct plug in for any early 944 or 924 car and if you have a late 85+ 944 than you will need to use your engine harness and it will bolt right in.

From a clean CA car 126k mile 924 S with automatic transmission, If needed I can include a factory bellhousing, w/clutch fork and rod, and flywheel for manual transaxle cars free. Car ran very strong, spark plugs have been pulled and bore scope revealed pristine piston walls with no scratching or gouges.

\$900 local pickup preferred or can ship in USA for +\$450 freight to your local YRC depot

Also can deliver within 4 hours of Northern, CA for \$200

thanks Shawn

If your 1988 motor is available, I am interested.

Looking to build a Spec 944, and need a new engine for my late 85.

I am located in Pleasanton Calif.
