

SOLD!! Traqmate Classic Complete

Posted by cbuzzetti - 08 May 2013 15:31

Data acquisition has never been easier or more affordable. Installation consists of powering up, a GPS antenna, and some velcro. Analysis is as easy as choosing your runs and hitting the PLAY button on the Traqview screen.

The Traqmate is a vehicle data acquisition device that uses a high-speed GPS receiver and high resolution accelerometers to track and record the speed of a vehicle, its absolute location, and forces acting on the vehicle. The Track Systems Traqview analysis program uses advanced mathematical algorithms to translate this data into visual form where it is easy to spot differences between drivers, vehicles, and sessions.

Use Traqmate's unique modes such as Race, Gauges, Drive, Autocross, G-Force and Inputs keep you informed and help tune your car to the max! The Traqmate Classic Complete stores everything internally, just like a memory stick.

Included in this sale are the following items.

- Traqmate GPS Sensor Unit
- Traqmate Display Unit w/ backlight
- Magnetic mount GPS antenna
- USB cable
- 6' Locking Connection Cable SU - DU (M - F)
- 12VDC Power Cable and manual

Note that the back light is intermittent. I do not have the CD with software. Even if I did you would still have to download the latest version. The software is available online for free.

This unit was just pulled from my racecar and has been verified as a working system. I upgraded to a complete digital dash with data.

send email to bajabuzz at yahoo dot com for pics.

Charlie

Re: F/S Traqmate Classic Complete \$500 + shipping
