

22.3 mm adjustable Rear sway bar

Posted by phils automotive - 15 Apr 2014 09:58

I had custom rear sway bars made. They are 22.3 mm with 3 adjustment holes. They come with urethane bushings and mount directly to the existing brackets using the stock straps. \$230.00 plus shipping. Any questions please ask. 610-967-5754

Would you ship to 12919 for 200.00 all in?

Cheers, John

No I cannot do that. I am selling the bars at almost cost and will not move on price. It is the cheapest large rear bar option available at this time. It bolts right up just as the O.E bars do.
