If Rob is at the head of the waiting list for 30/31mm T-bars, count me in second place if multiple sets come available.

Need to replace a set a fellow competitor let me use in my Spec build when they were out of stock a few months ago. At the time several vendors had 30/31s "on order expected end of month". Well that was April and they are back ordered, so I'm looking for third party sales just in case!

Good luck Rob!
