

Got the new car out at Road Atl!

Posted by brad.t - 15 Oct 2017 17:43

Took the new 944spec car out to Road Atlanta this weekend with PCA. Had a best lap of 1:46.866. This car feels GREAT! Can't wait to get into some actual racing!

This is also my first time running a traqmate or anything similar. This is old tech now I suppose (traqmate classic) but wow it is amazing to see this data. Today, I felt like the car had a little lower performance vs yesterday possibly due to the heat.

Dropping my 1.46 lap against my later 1.50s in the data, I can see that I was definitely the issue, not the car. Bottom of the esses, 99.4mph vs 93.7mph. Turn 3, 67mph vs 64. Really interesting to see it and makes me wonder why I lost pace. Something to work on I suppose.
