

Rebuilt Steering Int Shafts

Posted by jaje - 10 Jan 2011 09:04

Not sure if anyone here is interested but there's a thread on Rennlist about the potential for a shop to rebuild power or manual intermediate sheering shafts for \$100 or less. This would completely rebuild the u-joints on them. I don't think we can buy new ones anymore and the used ones are hard to come by and often have a lot of play in them.
