Creative way to reinstall windows for transit? Posted by Tabbasco - 30 Oct 2012 05:38
Trying not to reinvent the wheeldoes anyone have a way to install windows for transit to and from an event.
I removed mine for both weight and safety, as a hit on the door could send glass flying, but need to reinstall for transit
Was considering an aluminum cradle or possibly drilling thru the glass (if possible) and inserting two or three brackets to hold the window in place
Suggestions???
