944-SPEC - 944SPEC - low cost wheel to wheel racing Generated: 3 September, 2025, 22:08 Master cylinder Posted by rd7839 - 07 May 2013 07:21 Hey guys, I've heard repeatedly that you can't mix and match Girling and Ate parts like master cylinder and booster but Clark's garage says otherwise. The Girling m.c. Is a lot cheaper but will it work? If not why? Re: Master cylinder Posted by 944Racer72 - 07 May 2013 19:42 If you need it, I have a Girling booster too. Re: Master cylinder Posted by topley - 10 May 2013 13:01 according to this thread in the troubleshooting section the swap works... www.944spec.org/944SPEC/forum/troublesho...d-booster-comparison Re: Master cylinder Posted by rd7839 - 10 May 2013 16:10 Thanks, I missed that topic. So it seems the big difference is steel vs aluminum. At 1/4 the price, I'll take the steel one! Re: Master cylinder Posted by Big Dog - 10 May 2013 16:26 Al. is several grams lighter and the master cylinder is higher up, Ron. The extra money will cut your lap

Al. is several grams lighter and the master cylinder is higher up, Ron. The extra money will cut your laptimes by at least 2.5 seconds per lap!
