944-SPEC - 944SPEC - low cost wheel to wheel racing

Generated: 17 May, 2024, 09:21 Harness advise Posted by Gary_44 - 21 Jul 2008 13:35 What type of 5pt harness works for the 944, I don't mean which brand but what length, bolt mount or rollcage mount? thanks. I duplicated on the NASA forum, so no need to answer both. Re:Harness advise Posted by joepaluch - 22 Jul 2008 22:42 Gary 44 wrote: Do I read that right? An SFI 16.1 can be used with any head restraint, SFI 16.5 I'm limited to only HANS? Yep, 16.1 is the standard 3" belt. 16.5" are " Hans specific" and have 2" wide section where the ride over the HANS. Those belts are only allowed if a HANS is used. The 3" with an FIA tag gets you alot more useful life from them. I spent \$300 on a set of Schroth FIA belts a

can be used with either HANS or not. I use 3" belt. I also got ones with FIA approval. The reason is that SFI belts are good for only 2 years before the "expire". If they are also FIA rated then you get to used them for 5 years. Most belts are good for 5-10 years if you treat them right so gettings few years ago. Expensive belts, but very very nice. When these expire at the end of next year I will probably get another set of these belts.
