

Pedal Extensions?

Posted by Tedxdigs - 30 Sep 2019 12:12

Hey everybody - Ted here - I posted about a 944 ITS SCCA/Spec 944 NASA cross-build I was doing a few years ago - well it's been done for awhile, sitting in the garage after seasons end here in Minnesota and my Wife is learning how to drive and wants to do some auto crossing next season - So the question

.....

Does anybody know good pedal extensions for Porsche 944's? Either order kits, guides on making your own, etc that could get me another 8-14 inches in order to accommodate her? I would like to not need to install seat sliders/drill new mounts for my side-mount Sparco Sprint seat if possible, so I'm thinking pedal extenders would be the way to go

Thanks in advance - Ted
