

Interior dash question

Posted by FootofLead - 23 Jun 2012 16:58

Maybe this is posted somewhere else but I want to make sure I understand something in the spec rules.

It says that dashboard may be modified or replaced with panels that will conceal the instrument cluster and wiring.

What if the dash is removed completely? Is that still legal? I'm looking into buying a spec 944 and want a little clarification to this rule.

Thanks

actually go to following website (cidiusmedia.com) and under the video section you will see a thumbnail of a race drive walking in fog. Click on that video, it is a commercial for 944-spec.org. The black car #805 is mine and the dashboard, switches and gauges in the video are mine. Additionally it is a very cool 944 Spec video.

How much does it weigh after you pull all the unnecessary stuff off?

I am guessing 10 lbs as I trimmed mine down to what u see... I am sure it was less than 20 before trimming as it is made of tin

Ken weighed his stripped dash at 7 lbs, 4 oz.
