

Track width will go up 1/4" in 2013 d/t RR tires

Posted by Sterling Doc - 06 Nov 2012 17:05

This is more of an announcement than a rules change request. RR's are slightly wider than RA-1's.

We could specific separate max track for the RA-1 (rain races), and RR's (dry races), but I don't think it's worth the fuss unless others someone has an objection.

Good catch on the track width!!!

That could have been an ugly situation.

I would stay with just one measurement. You want a narrower track width in the rain anyways.

I agree, for once, with Mr. B. One measurement is enough.
