

2014 Rules Change Requests - post here!

Posted by Sterling Doc - 07 Oct 2013 18:25

Silly Season opens today!

Post up your rules change requests here.

We will collect them for a week or so, and assemble them in individual threads for debate.

I understand your intent, Ken. It just doesn't need a rule. Unlike GTS, there is not much to be gained by manipulating this - the TQ curve is already near optimal, and we regulate max TQ.

I am proposing the following changes:

1) **Inlet Air** - Use of left turn signal in bumper. Using the stock location or fog lamp location does little for performance but fills up the air filter with rubber and sand. It is not about "ram air", but protecting my motor.

2) **Allow use of Lexan for side windows**. This would allow the installation of a naca duct. Even with a cool suit, I need air flow. Being in the south, our cars easily exceed 110+ inside the car. Cost to replace my windows using one small sheet from Lowes, \$20 (low cost)

3) **Removal of spare tire well** regardless of year of vehicle, the ease of removing a transaxle is worth it. Allow sheet metal to be placed over the opening, identical to how we cover the air intake in the front.

Tater

1) Is already up on the proposal list. I'll take it as a yes vote.

2) I'll add this to the list again this year.

3) I'll add this to the list.

With this, I'm going to close down suggestions. I'll leave the other thread open for comments for one week, then we've got to move on this to get the new rules out.

Proposals:

- Oil pan windage tray

These are cheap and greatly limit the oil aeration which is a factor in rod bearing bearing failures. There is little if any difference in performance only longevity. This would be optional but allowed.

- Crank Scraper

Like the windage tray this helps to return the oil to the sump without being aerated and increasing the oil available at the sump. This would add longevity and would be optional.

Great ideas, not sure why this had not come up earlier.

Joe, unfortunately, the rules change proposal period closed a couple of weeks ago. You can bring it up

for debate again next year.

I will be posting the decisions on this years proposals tonight or tomorrow.
