Tranny Mount Mod seems silly. Posted by joeblow - 07 May 2014 09:50	
OK so I know we can 'fill' the void in the single point mount to stiffen it with polyurethane. This is a litt silly dont you think? I mean we are stiffening the mount, but we could do this with a bracket style mound both better and cheaper than the cost of the polyurethane.	
Can I propose we allow any mount so long as it is dimensionally equal (mount position). I can weld u bracket in like 10 mins.	ра
