Meet me at Road Atlanta!

Posted by Sterling Doc - 26 Feb 2013 14:37

_____

Who's in for the Road Atlanta event?

I've been watching all the build parties at the Chicken Shack and enthusiasm for the class down there, and am coming down to pay you guys a visit. Let's talk about building the class, going fast, and having fun! Besides, I've got a track record to defend! I will be bringing my Traqmate down, and will be happy to share data as well.

Let's start a roll call here:

1. Eric

2. Michael

3. Brian

4. Jason

5. Duffy - making his race debut!

6. Victor

_____

Jason,

You should run DE3 on Friday. Michael is running to give me practice with traffic awareness and corner passing. The car is just about perfect. We are going to put in the LSD at the chicken shack Thursday night.

_____

Do you guys have the tools to put an LSD in a trans? We are looking for someone to do that around - no one around here does.

_____

Our guy is actually moving to your area this week. Michael Dearstyne is our technical guru. I have yet to see something he could not handle. He has been invaluable in the build of my race car. He is very good at teaching how to maintain your car.

I had a turbo transmission that had the short fifth, which we swapped to a long fifth. I am going to sell the turbo with the long fifth to one of the LS1 guys hopefully. I has three non-LSD transmissions, so we are going to install the short fifth and LSD so I can run it this weekend.

Give Michael a hammer, pry bar and monkey to assist him and he can do anything!
